

Our English teacher, Mrs Rania Sarri, asked us to write down the hours we spend on our after school activities for a whole week. Then she helped us found the **average** for each activity.

We worked in teams and this is what we came up with:

	Activities	Hour
s per week		
	We play with our friends	
4		
	We watch T.V	
11		
	We have afternoon classes	

7

We study

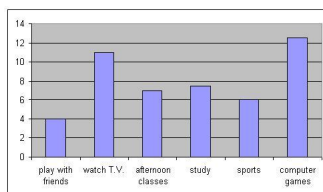

7,5

We do sports

6

We play computer games

12,5

Conclusions:

It seems that we spend most of our after-school time alone, playing games on our computer. Also, we spend the least of our time playing with our friends.

Do you think the computer has become our best friend ?

Glossary: average: μέσος όρος

the least: το λιγότερο

has become: έχει γίνει

The students of E class

(special thanks to our ICT teacher, Mr John Zavounis)
